 SUPERVISORY PATENT EXAMINER

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Fleming, attorney of record on 2-1-05.

The application has been amended as follows: the last three lines of claims 29 (i.e., other and with the output...of the second gate.) has been replaced with the following lines:

*"other and with the input of the second gate, and the sources of the one n-channel field effect transistor and the one p-channel field effect transistor connected with the other and with the output of the second gate,*

*wherein the first gate is configured to invert the output signal of the first delay element and, the second gate is configured to advance the output signal of the second delay element in a non-inverted manner."*

2. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose an apparatus comprising elements being configured as recited in claims. Specifically, none of the prior art teaches or fairly suggests, among other things, the limitation "wherein when the output signal of the particular signal delay element is inverted vis-à-vis the signal (IN), the gate connected with the particular signal delay element is designed such that the gate advances the output signal in an inverted manner and. when the output signal of the particular signal delay element is non-inverted vis-à-vis the signal (IN), the gate connected with

the particular signal delay element is designed such that the gate advances the output signal in a non-inverted manner” as required by claims 1, 26 and 29.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

3. Enclosed herein one of the reference that was discussed during the telephone interview. For the record, the recitation of the limitation “a second gate” reads on gate 31 of figure 3 of the Lim et al reference (U.S. Patent 6,087,887).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to An T. Luu whose telephone number is 571-272-1746. The examiner can normally be reached on 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner’s supervisor, Timothy P. Callahan can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
